RE: Longitudinal Profile of ICES Student Ratings

Following a unit representative's request for a Longitudinal Profile of your ICES student ratings, we have sent one copy to that person and one copy to you.

The results are from the two global items on each ICES form: "Rate the Instructor's Overall Teaching Effectiveness" and "Rate the Overall Quality of This Course." The normative comparison group reported on profiles is campus-wide instructors teaching required, mixed, or elective courses. In providing this information, we have followed these conditions:

- We supplied only data that you originally released to the unit representative.

- We included class sections with fewer than five students if requested.

- We searched computer files that began in Spring 1978.

- We did not exclude results that may seem unfavorable. Thus, all student evaluation summaries that fit the above criteria are included.

Longitudinal Summary of ICES Student Ratings
*** Interpretive Guide ***

Prior to 1987:

Item 2: Rate the Instructor.
Item 3: Rate the Course in General.

   Scoring: 6=Excellent.....1=Very Poor

1987 to present:

Item 1: Rate the Instructor's Overall Teaching Effectiveness.
Item 2: Rate the Overall Quality of This Course.

   Scoring: 5=Exceptionally High.....1=Exceptionally Low

The cutoff scores for the norm categories are based on the student designation of the course as required (r), mixed (m), or elective (e) and instructor rank from university-wide data records.

The norm categories are:

High	Top 10%
High Avg	Next 20%
Avg	Middle 40%
Low Avg	Next 20%
Low	Bottom 10%

"N/A" appears in the mean *and* norm columns for any item when fewer than 50% of the responses to the item are valid. "N/A" will also appear in the norm columns, but not mean columns, if the course used Evaluation Online (EON) instead of ICES for the official course evaluation (this last case is typical for online courses). For data reported before 1987, cutoff scores are based on the six-position response norms established in 1986.
